

/Users/fevange/Source
/forte/src/base_classes
/state_info.h

```
graph TD; A["/Users/fevange/Source  
/forte/src/base_classes  
/state_info.h"] --> B["string"]; A --> C["vector"];
```

The diagram illustrates a file dependency. A top box contains the file path `/Users/fevange/Source/forte/src/base_classes/state_info.h`. Two blue arrows point from this box to two separate bottom boxes labeled `string` and `vector`, indicating that the top file depends on these two standard library components.

string

vector
